

TVA Public Notice

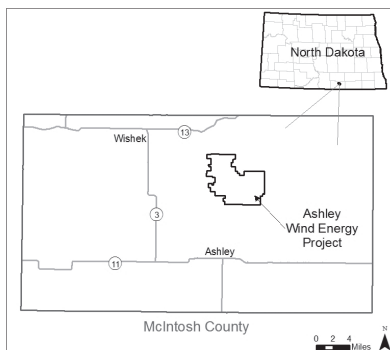

Wind energy project

The Tennessee Valley Authority, an independent federal corporation of the U.S. Government, will prepare an environmental assessment or environmental impact statement to determine the effects of obtaining renewable energy from a proposed wind power project in McIntosh County, N.D. TVA would purchase approximately 200 megawatts of power from the facility for a 20-year period.

CPV Ashley Renewable Energy Company LLC, a private energy development company based in Silver Spring, Md., would construct and operate the Ashley Wind Energy Project. The facility would consist of from 67 to 133 wind turbines spread across up to 17,400 acres of land.

Additional information about the project is available in the public libraries of Ashley, Wishek and Bismarck (Veterans Memorial), N.D., as well as on TVA's website at www.tva.com/environment/reports.

TVA is soliciting comments from the general public, other agencies, nongovernmental organizations and Native American tribes. TVA will consider these comments as it determines the project's scope and potential to affect the environment, historic properties or other concerns. All comments received, including names and addresses, will become part of the administrative record and will be available for public inspection.

To ensure consideration, comments must be received in written form by February 29, 2010. Please include "CPV Ashley Wind Energy Project" in the title of submitted comments and send them by mail, fax or e-mail to:
